

# Why now is the time for a JDE to Oracle Cloud ERP migration

## Realize the benefits of cloud applications

The complex nature of the on-premises JDE ERP solution is becoming increasingly apparent for many business leaders who have yet to move to the cloud. By not embracing a digital transformation fueled by upgrading to Oracle Cloud ERP solutions, they are struggling with technical and productivity issues like:

- ✓ Lengthy upgrades
- ✓ Complex integrations
- ✓ Risky customizations
- ✓ Limitations in reporting and insights

## 3 reasons to move to Oracle Cloud ERP

### 1 Work at the speed of business

On-premises ERP solutions are notorious for adding time to projects that could be completed more seamlessly and autonomously with cloud-based solutions. With a JDE to Oracle Cloud ERP migration, you can:

- Start as big — or as small — as you want
- Transition quickly without business interruption
- Meet the demands of the market

### 2 Improve processes and capabilities

Process improvement is a typical launching point for digital transformation. Oracle Cloud ERP provides your business with greater capabilities and functionality, helping you:

- Improve financial planning and analysis (FP&A), transportation and logistics, sales and operations planning, and supply chain planning
- Optimize and automate key processes, including AP invoicing, procure-to-pay, record-to-report, and plan-to-produce
- Reduce complexity, customizations, and manual processes

### 3 Maximize your technology investment

A Nucleus Research-commissioned report found that cloud ERP solutions, when compared to on-premises ERP, generate value that supports overall corporate goals and strategy, including:

- 4x greater return on investment
- 2.5x faster investment payback
- 2.3x lower total cost of ownership

# Are you ready to migrate?

To assess your cloud-readiness, make sure you consider these essential questions before taking the next steps:

- 1 What is our executive vision, and why is it important?
- 2 Are we ready for change?
- 3 What will the impact be on our people?
- 4 Where are our greatest opportunities for improvement?
- 5 What do we expect in terms of business value?
- 6 What resources and budget will it take to transition?
- 7 How do we define success?

## Leverage the expertise of a strategic partner for migration success

Keeping these three reasons and seven questions in mind, it is critical to find a strategic partner to guide your business transformation with solution expertise and best practices for moving from JDE to Oracle Cloud ERP.

Argano has a proven track record in successful JDE to cloud implementations — our singular focus helps JDE clients chart a successful path to Oracle Cloud Applications.

With a proven, outcome-focused approach and toolset, we help you develop a business case and practical plan for migrating to the cloud, driving measurable results and accelerating greater value for your business.

Start your cloud journey today with a **complimentary assessment**.
